

Playground Wellbeing Committee

The Playground Wellbeing Committee is made up of representatives from each class in school and its purpose is to provide pupil input to wellbeing on the playground. The Committee has met regularly throughout the school year to make decisions that have influenced changes on the playground linked to wellbeing. The Committee has been able to identify areas for improvement to playground wellbeing and to cooperate to create actions for these improvements. Most recently the Committee have been working on creating polite reminders for quiet areas, posters to remind children of fair play and have taken responsibility for making sure the playground chalk is always out on dry weather days. The children have worked so hard to take ownership of playground wellbeing through the Committee.
